## PERSONAL STATEMENT

Healthcare analytics professional with nearly a decade of experience in managed care, network operations, and value-based care programming. Expert in engineering production-grade data pipelines for claims and provider data. Proven success in automating administrative data exchanges to optimize technical infrastructure, eliminate operational toil, and drive medical cost-saving initiatives.

## CORE TECHNICAL SKILLS

**Data Engineering:** SQL, Python, dbt, Kubernetes, ETL, HL7 FHIR, sFTP

**Analytics & BI:** Looker Studio Pro, Tableau, SAS, IBM Cognos, MicroStrategy, Inovalon Converged Analytics, BigQuery

**Domain Expertise:** Value-Based Care (VBC), HEDIS, STARS, EDI Standards.

**Advanced Tools:** Cursor, Claude Code, Salesforce

## WORK EXPERIENCE

### Oscar Health (New York, NY)

Oscar Health (New York, NY) | Clinical Data Science Associate, VBC - Network Analytics

*March 2025-Current*

- Directed cross-functional efforts to build a VBC reporting infrastructure that informed business strategy by forecasting network performance and closing clinical data gaps prospectively to drive seven-figure cost savings across the markets.
- Engineered production dbt projects using Inovalon Converged Analytics to scale enterprise-wide claims aggregation, increasing data reliability for operational staff HEDIS projects.
- Optimized enterprise-level STARS dashboards to accelerate domain-based initiatives and enhance reporting efficiency.

Oscar Health (New York, NY) | Data Associate, Clinical Analytics

*September 2023-March 2025*

- Collaborated with stakeholders to stand-up clinical quality audits for Utilization & Case Management workflows against accreditation best practices to allow for personnel segmentation and driving optimized care flows.
- Streamlined and sustained data pipelines to facilitate provider group - health plan partnerships, improving data ingestion & lowering required analytics throughput.
- Supervised analyst resourcing within the Clinical Analytics pod, ensuring alignment with organizational priorities and adequate analytics staffing for high-priority data initiatives.

Oscar Health (New York, NY) | HEDIS Analyst, Risk Adjustment - STARS Data Team

*August 2021-August 2023*

- Accelerated STARS rating improvements by delivering targeted analytics and reporting for the Value Capture team, directly impacting performance outcomes aligned to NCQA specifications.
- Eliminated manual file creation by developing automated sFTP scripting for bi-directional administrative and clinical data feeds, saving 40 hours of manual data extract formatting monthly in collaboration within the Inovalon Converged Analytics engine
- Designed member engagement campaigns that improved risk capture and increased adherence to preventive medical screenings across the member population via point of care vendor initiatives.

### Centene Corporation (New York, NY)

*May 2018-July 2021*

Fidelis Care (New York, NY) | Analyst - Value Based Initiatives

*June 2020-July 2021*

- Refined Value-Based Payment (VBP) contract negotiations by acting as a tactical liaison between internal stakeholders & provider partners through actionable panel insights.
- Improved the utility of existing reporting tools by translating partner feedback into technical enhancements that supported population health decision-making.

WellCare Health Plan (New York, NY) | Network Performance Business Analyst

*September 2018-May 2020*

- Acted as a strategic consultant for provider relations, evaluating the financial health and utilization trends of physician group contracts by monitoring risk program progression, and validating capitation models to ensure payment accuracy.
- Standardized health analytics & membership reporting for IPA management to enhance market engagement and ensure provider alignment with corporate medical cost objectives.

## EDUCATION

**RUTGERS UNIVERSITY (NEW BRUNSWICK, NJ) | B.S. & M.S. IN HEALTH ADMINISTRATION**
